

## Puppy Vaccine Plan

At each visit, your pup will have a detailed physical exam to ensure proper growth and development with complimentary puppy nail trim.

### **First Visit- 8 weeks**

- DHPP#1
- Bordetella (oral)
- Deworming for intestinal parasites
- **FREE** Puppy Pack (When available) –puppy’s first doses of heartworm, flea and tick preventatives.

### **Second Visit- 12 weeks**

- DHPP #2- Booster
- Rabies 1 year
- Lepto #1
- Lyme #1

### **Third Visit- 16 weeks**

- DHPP #3- final booster
- Lepto #2- final booster
- Lyme #2- final booster

### **What Are We Reducing the Risk Of?**

- DHPP: (distemper, adenovirus, parvo, parainfluenza)
  - respiratory, intestinal, neurological & liver diseases
- Leptospirosis: bacteria shed in urine of wildlife; GI upset, liver, kidney failure
- Lyme: bacteria spread from ticks; pain & inflammation of joints, kidney failure
- Bordetella: pneumonia, contagious cough; aka: “kennel cough”

**Spay/Neuter** - Usually between 6-8 months of age

**GAH Parasite Prevention Options**: flea/tick product + Heartgard/ProHeart = complete protection

- Frontline Gold--monthly topical (flea/tick)
- Nexgard –Monthly chew tab (flea/tick): 8 weeks - 6 months
- Simparica--monthly chew tab (flea/tick): 6 months of age & older
- Heartgard Plus--Monthly chew tab to prevent heartworm/deworming
- ProHeart Injection - Annual shot to prevent heartworm/provide deworming
